

Last week, I had the privilege of being interviewed by the New York Times, MSNBC, and ABC News regarding the serious concerns surrounding the use of non-secure channels and personal cell phones to share military attack plans. Operational Security (OPSEC) and Communications Security (COMSEC) are core principles that the U.S. Military upholds with the utmost seriousness, guided by strong leadership. In these interviews, I shared why maintaining the highest standards of security is not just essential for protecting our troops, but also critical to mission success and preserving the strength of the greatest fighting force in the world. I'm proud to contribute to this vital conversation, and I hope you'll find the insights valuable:

For the full story and more insights, check out the original New York Times article ["Signal Chat Leak Angers U.S. Military Pilots"](#) ; and you can also view the full MSNBC video below:
